1. *Claims 1-18 are pending.*

***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Grant Johnson at 507-253-4660

Claim 14 is canceled. No claims depend upon claim 14, and the remaining claims are as set forth by the After final amendment of 8/15/05.

***Reasons for Allowance***

2. The Examiner has suggested to the Applicant, the amending of the term "geographically-specific" to "geographically-unique".

The Examiner has identified Hastings et al., US patent 6370629 as the closest art of record.

It is the Examiner's position that Hastings et al. US patent 6370629 read upon Applicant's claim wherein the Applicant recited the term "Geographically specific", an

Art Unit: 2134

embodiment wherein passwords are associated with a particular region. For this reason, the scope of Applicant's previous claims were anticipated by the closest prior art Hastings, as Hastings(Column 4, lines 32-40) recites "...the producer can associated specific geographic region/data/time information of lists.." "If the user's actual geographic position and the current data and time are within the authorized geographic region and the authorized data/time corresponding to the user password 150, then the user can access the selected files via the user interface 95." Hastings recites access to the system based on a geographic location and time. It was the Examiner's position that access to the system such that "if the user's actual geographic position...correspond to the user's password" is sufficient to read upon a disclosure where a password is specific to a geographic region. However, the disclosure is insufficient to read upon a claimed disclosure where the password is unique to a particular geographic location. Support is given in the Applicant's specification to this limitation in that Applicant recites a plurality of geographic locations.

For this reason the Examiner has suggested to the Applicant that if a claim is made to the more specific term "geographically-unique", it would over come the rejection of the closest prior art. Applicant has done so, and accordingly the remaining claims are allowable.
